

# ICE Building a web site on line

[www.webs.com](http://www.webs.com)

1. login = email
2. pass word =
3. the web address you will get will be <http://yourname.webs.com>
4. Select a name that is short and relates to your web site
5. Select a site / page template from the free selection and alter it to suit your requirements
6. The default is about 4 pages but can add or delete pages and the menu will adjust automatically
7. You can select from a wide array of pictures tailored of the subject selected or upload your own.
8. use your own video clip or one from youtube ect
9. Save progressively & check in your browser to see if is what you expected.
10. its easy to use a contact form and / or email link as they are preformed
11. You photos can be formatted to a timed slide show on line
